

**Daily epidemiological surveillance report
new coronavirus infection (COVID-19)
Data until April 11, 2020, at 15:00**

The data presented are related to cases of epidemiological surveillance of the disease by the new coronavirus (COVID-19), based on the data that have been declared to EODY and is recorded until April 11, 2020 (time 15:00). The new confirmed laboratory cases of the disease is 72.

The total number of cases amounts to 2081 (daily change + 3.6%), of which 56.8% men. The youth deaths patients with COVID-19 are 3, while since the beginning of the epidemic they have been recorded as a whole 93 deaths. THE average age of patients who have died are 72 years. The number of patients being treated intubated is 75 (80.0% men).

The daily distribution of confirmed cases is as follows (the line represents the total, cumulative distribution of cases).

Diagram 1: Number of laboratory confirmed COVID-19 cases in Greece, April 11, 2020

Note: the columns in Figure 1 express the number of new cases based on the date of receipt of the laboratory sample, and not based on the date of announcement of the cases.

Diagram 2: Number of laboratory confirmed deaths with COVID-19 in Greece,

Out of a total of 2081 cases, 535 (25.7%) are related to travel from abroad, 796 (38.3%) are related to an already known case and the rest are not related to travel or another known case or are still under investigation.

The average age of cases is 49 years (range 0 to 101 years), while the average age of deaths is 72 years (range 39 to 95 years). The age distribution of (a) total outbreaks, (b) deaths and (c) of patients treated by intubation is as follows:

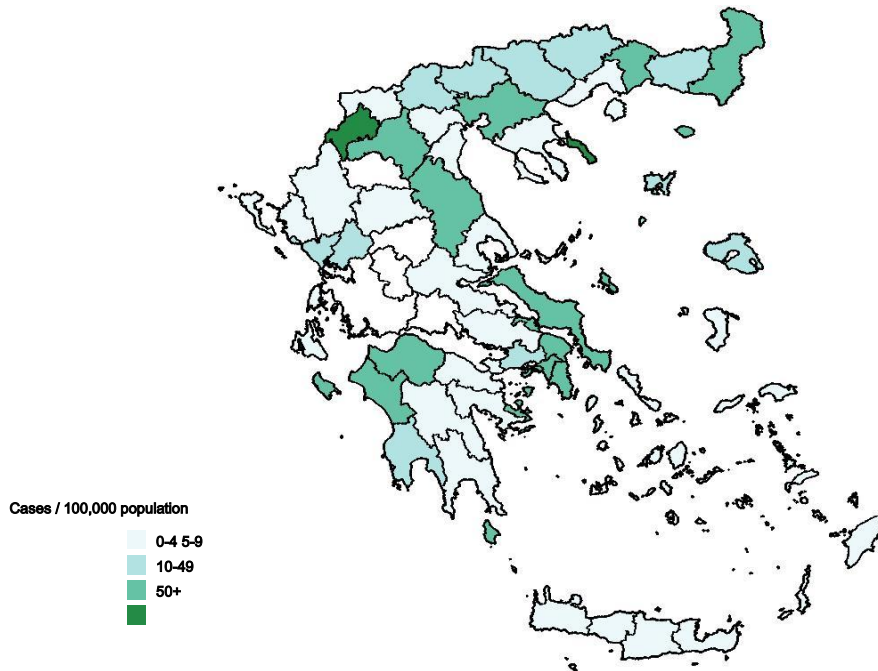

Table 1: Age distribution of confirmed COVID-19 cases

	A total of cases COVID-19 *	Deaths of patients with COVID-19	Hospitalized intubated
Total			
0 - 17 years old	69 (3.4%)	0 (0.0%)	0 (0.0%)
18 - 39 years old	615 (30.7%)	1 (1.1%)	0 (0.0%)
40 - 64 years old	892 (44.6%)	25 (26.9%)	33 (44.0%)
65 and over	426 (21.3%)	67 (72.0%)	42 (56.0%)
Men			
0 - 17 years old	31 (2.7%)	0 (0.0%)	0 (0.0%)
18 - 39 years old	340 (29.8%)	1 (1.5%)	0 (0.0%)
40 - 64 years old	514 (45.0%)	22 (32.8%)	22 (36.1%)
65 and over	256 (22.4%)	44 (65.7%)	39 (63.9%)
Women			
0 - 17 years old	38 (4.4%)	0 (0.0%)	0 (0.0%)
18 - 39 years old	275 (31.9%)	0 (0.0%)	0 (0.0%)
40 - 64 years old	378 (43.9%)	3 (11.5%)	11 (78.6%)
65 and over	170 (19.7%)	23 (88.5%)	3 (21.4%)

Geographical dispersion

The map shows the geographical distribution of total COVID-19 cases per Regional Unit of the country, based on the declared permanent residence address of the patient.

Figure 3: Confirmation of confirmed cases of COVID-19 cases, April 11, 2020

Samples that have been tested in the laboratories cooperating with EODY: From January 1, 2020 until today, in the laboratories that carry out checks for the new coronoid (SARS-CoV-2) and that systematically declare to EODY all the samples that they test (positive and negative), have been tested in total 37344 clinical samples, of which 2417 (6.5%) were positive in the coronary artery.
